🧠 About Me

```
derek = {
    "name"       : "Derek Ike (Chukwuemeka Ike)",
    "location"   : "Toronto, ON, Canada",
    "education"  : "MSc Spatial Planning & Sustainability — Umeå University (2026)",
    "background" : ["Architecture", "Last-Mile Logistics", "Site Supervision", "GIS"],
    "experience" : ["Instabox Sweden (logistics ops)", "CAD drafting", "Prairie Nordic (
    "languages"  : ["English (fluent)", "Swedish (basic)"],
    "building"   : "Prairie Nordic Integrated Services — rural Alberta logistics infrast
    "seeking"    : ["IT roles", "Data / GIS positions", "Logistics tech"],
}
```

I have **5+ years** across architecture, construction, and logistics operations in Canada and Europe.
Now applying that domain knowledge through code — building data pipelines, web apps, and GIS tools that solve real infrastructure problems.

📌 Featured Projects

🚛 logistics-data-pipeline

> ***Python · Pandas · NumPy · Matplotlib***

A full data pipeline that cleans, processes, and analyses last-mile delivery route data across 16 rural Alberta municipalities.

What it does	Output
Loads 500-record CSV with realistic noise	Validated clean dataset
Audits & fixes missing values, bad types, negatives	`output/cleaned_routes.csv`

6 analysis modules: zones, hubs, vehicles, time patterns, efficiency, success rates	`output/summary_report.csv`
Generates 10 publication-quality charts	`output/charts/`

```
git clone https://github.com/derekike/logistics-data-pipeline
pip install -r requirements.txt
python main.py
```

Key finding: Camrose and Two Hills flagged as underserved — high avg distance (31+ km), low success rate (32–43%), strong case for new hub placement.

🌐 logistics-web-app · Live Demo →

> ***HTML · CSS · JavaScript · Deployed on Netlify***

A clean, responsive single-page web application presenting Prairie Nordic's services, coverage zones, and live data dashboard — built with zero dependencies.

Features:

- 🏠 Hero section with animated stat counters
- 🔎 Zone cards with interactive hub filter
- 📊 Data dashboard pulling directly from the pipeline analysis
- 📬 Client-side validated inquiry form
- 📱 Fully mobile-responsive

```
No build step. No npm. Open index.html — it just works.
```

🗺️ gis-logistics-visualizer · Open Map →

> ***Leaflet.js · GeoJSON · Vanilla JS***

An interactive GIS web map visualising distribution hubs, delivery zones, and route corridors across rural Alberta — **this is the killer project.**

Map features:

- 📍 **4 hub markers** at real GPS coordinates (Leaflet custom SVG icons)

- ⭕ **16 zone circles** sized proportionally to delivery volume
- 🛣️ **14 route corridors** as colour-coded dashed polylines per hub
- 🔘 **Layer toggles** — Hubs / Zones / Routes / 30 km Radius
- 🔍 **Hub filter** — isolates one hub's zones and flies the map to it
- 📋 **Rich popups** with full delivery metrics per feature
- 📊 **Live sidebar stats** that update on filter
- 📱 **Mobile-first** — sidebar collapses to burger on small screens

Spatial data covers:

Leduc County · Athabasca · Vegreville · Ponoka · Red Deer County · Lacombe · Wetaskiwin · Stettler · Camrose · Two Hills · Bonnyville · Lloydminster · Wainwright · Vermilion · Provost · Cold Lake

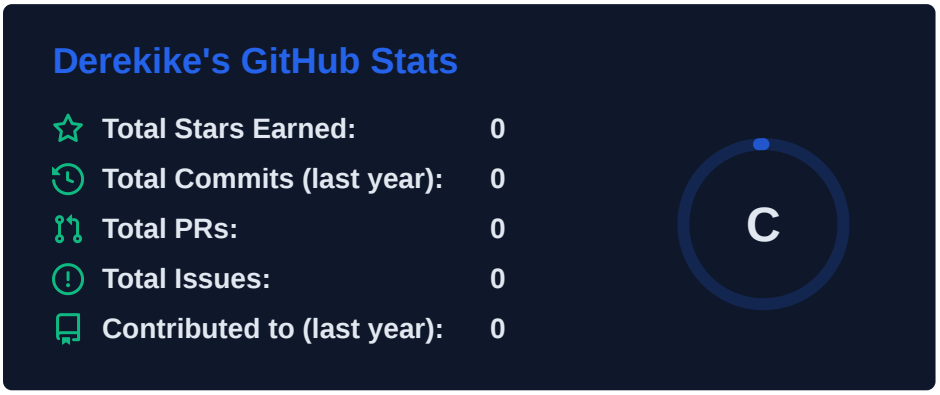
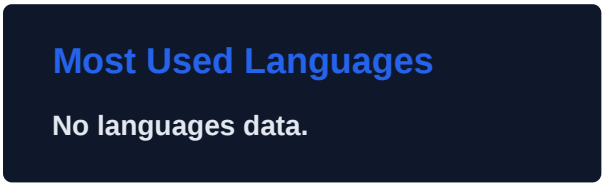
📊 GitHub Stats





🌍 Background That Shapes My Work

```
📐  BSc Architecture          → Systems thinking, spatial analysis, technical drawing
🏗️  Site Supervision          → On-the-ground logistics, scheduling, quality control
📦  Instabox Sweden           → European last-mile delivery ops, route efficiency
🎓  MSc Spatial Planning      → GIS methodology, sustainability, land-use frameworks
🏢  Prairie Nordic (Founder)  → Applying all of the above to a real infrastructure proble
```

I don't build toy projects.

Every repo here connects directly to a real business problem I understand from ground level.

🤝 Let's Connect

I'm actively looking for **IT support**, **data analyst**, **GIS technician**, or **logistics tech** roles in Toronto or remote across Canada.

If you're building something in:

- 🚚 Logistics / supply chain technology
- 🗺️ GIS / geospatial data
- 📊 Data pipelines / analytics
- 🏙️ Urban / rural infrastructure

I want to hear from you.

PRAIRIE NORDIC WEB APP

"Rural Alberta lacks the last-mile logistics infrastructure that urban centres take for granted. I'm building the data and technology layer that makes it viable."

— Derek Ike, Founder — Prairie Nordic Integrated Services Ltd.
